BEVELING AND EDGEWORK STANDARDS

The following are the quality standards used by our inspection team.

DIMENSIONS

Overall dimensions on edged and non-edged pieces

1/8, 3/16 and 1/4" material +/- 1/16"

3/8" material +/- 1/8"

1/2" material +/- 1/4"

EDGE QUALITY

Edged pieces will be completely edged.

Edged pieces will be free of chips.

Non-edged pieces: chips will not exceed 1/16" unless otherwise specified

SURFACE QUALITY

All glass and mirror products are shipped clean on front, back and edges.

Seeds and scratches are not visible at arm's length viewed vertically under normal fluorescent light.

BEVEL QUALITY

Width of bevel will be +/- 1/16".

SHIPPING

All reasonable efforts are made to ship the entire order by the "need by" date.

The above are considered normal industry standards. If your requirements exceed the ones given here, please contact us immediately.
